The State of Diabetes in the Mission Health Community

- Mission Hospital is a tertiary center for WNC
- Estimated that 9% of adults have diabetes in WNC

Race and ethnicity disparities in inpatient Hemoglobin A1c levels

- A higher proportion of Am Indians and Blacks have uncontrolled diabetes

Race and ethnicity disparities in inpatient service line visits

Mission Health’s BIG(GER) Aim is to get each patient to the desired outcome, first without harm, also without waste and with an exceptional experience for the patient and family.
